

GRANTEE QUESTIONS	NIH GPS Section (Blanks =0)				Yes = 1; No=2
The PI needs to purchase a \$20,000 piece of essential equipment for the research that has broken. The equipment was not part of the original R01 application, and the we agree with the PI that this purchase does not reflect a change of scope. Is prior approval required?					
It is year 3 of a 5-year award. Our institution's indirect rate has risen from 48% to 50%. Will the NIH increase this award to award the additional indirect costs?					
An application included foreign travel to permit the PI to collect data. Now awarded the PI wants to use the cheaper national carrier for the that country for a direct flight, but they are being told they need to use the more expensive U.S. carrier for my direct flight. Is that true?					
As awarded funds for the graduate student researcher (GSR) on the R01 grant included the salary \$37,500 and appropriate tuition remission and benefits (totalling \$61,000). Can we now rebudget and compensate the GSR at the rate of \$40,000/year?					
Does a PI have to be a U.S. citizen to apply for an R01?					
Is the progress report for the multi-year funded R15 grant due 45 days before it's July 1 anniversary date?					
If the consortium indirecst increase the direct costs to more that \$250,000, must I submit a categorial (as opposed to a modular) budget?					
SUM OF EACH COLUMN					

DIRECTIONS: I don't just need the yes-no answer to the questions: I need the specific Grants Policy Statement (GPS) reference to share with administrators and/or other co-investigators. Enter the specific GPS reference (e.g., Section 1.2.4.3) that points you and the grantee to the answer. If the reference does not have 4 digits, use 0's (e.g., Section 1.2 would be 1.2.0.0). Enter the answer to the grantee's question either as 1 for YES or 2 for NO. Record the sum of each column.
