

**Be curious. Learn.
Prepare for
your future.**

**Begin with an Autodesk
Learning Partner today**

Further your career and equip yourself with marketable advanced skills using some of the most powerful design software in the world. Autodesk Learning Partners stand out as leaders in training those who choose to make progress rather than wait for it.

Learn from organizations and businesses that have been approved by Autodesk® and recognized for their outstanding knowledge and delivery of high-quality learning experiences. Autodesk authorizes organizations and businesses to become Autodesk Learning Partners and provides them with access to genuine Autodesk software technology solutions, confirms their enhanced knowledge of how to use Autodesk solutions, and verifies their effective teaching techniques. Learning Partners are trained and supported to empower you to learn and stand out in your field, ready to pursue new job opportunities and career advancement.

Autodesk Learning Partners prepare you with powerful tools for the industries of your future

- ▶ Access genuine Autodesk software technology solutions from partners recognized for their Autodesk expertise
- ▶ Learn from instructors approved by Autodesk for their effective teaching and unparalleled understanding of Autodesk solutions
- ▶ Improve your product mastery and earn certifications with badges that authenticate and verify your product knowledge
- ▶ Receive certificates for completion of Learning Partner classes
- ▶ Learn your way—attend in-person or remote classes, where available

Autodesk Learning Partners provide learning services in over 30 languages, with a worldwide footprint in over 200 countries.

**Knowledge is power.
Especially with Autodesk.**

Credentials for skills that are critical to the careers of our ever-changing future

Skills and credentials are more important than ever for the future of work. Job postings increasingly target skills and experience.¹ Our Learning Partner reach is estimated at over 400,000 learners annually and over 30,000 Autodesk course offerings.² Autodesk Learning Partners provide you with the skills you need to stand out in the job market or in the workplace for careers of the future, with verifiable credentials to back up your career growth effort.

You can trust Autodesk Learning Partners to deliver high quality, relevant learning. Over 90% of their customers reported being satisfied with Autodesk Learning Partner courses in the most recent round of evaluations.³ Industry professionals, educators, and students receive course delivery in flexible formats that fit their own lives and learning needs from Partners approved for their effective teaching.

Autodesk Certified Instructors are credentialed professionals recognized for their product mastery, delivery, and instructional skills. ACIs must maintain their credentials and receive advanced recognition based on maintaining their certification over time. Learn more about ACIs here: autodesk.com/training/certified-instructors
