

Enable learners to adapt in an ever-changing world

Mentor future innovators as an Autodesk Learning Partner

Autodesk Learning Partners stand out as knowledge leaders that provide training to those who choose to make progress rather than wait for it. Expand your business, offer new training services, and enable future innovators by becoming an Autodesk Learning Partner.

Autodesk authorizes businesses and institutions as Autodesk Learning Partners, giving them a compelling Autodesk partnership opportunity and the ability to align with the progress and empowerment Autodesk stands for.

Learning Partners benefit from access to genuine Autodesk software technology solutions, the ability to use Autodesk's survey evaluation system for training participant feedback, reporting tools for management of their training business, and select opportunities to deliver approved Autodesk-funded activities to education customers.

Learning Partner instructors receive advanced product training and instructional development and can earn Autodesk Certified Instructor credentials over time. Autodesk supports our Learning Partners in their mission to empower learners, enabling them to adapt in an ever-changing world.

Outstanding benefits support our Learning Partner leaders

- ▶ Promote your Autodesk partnership and attract new learners with use of the Autodesk Learning Partner logo and program logos in marketing
- ▶ Facilitate teaching in person, or to remote learners, in approved learning environments demanded by today's customers
- ▶ Issue authorized course completion certificates to your customers
- ▶ Receive Autodesk lead referrals for customers who want to learn from authorized Learning Partners
- ▶ Access genuine Autodesk software for your instructors and learners
- ▶ Utilize professional development resources for your instructors
- ▶ Motivate your instructors to earn their Autodesk Certified Instructor credential
- ▶ Discover even more benefits—become a Learning Partner

Find your organization's role in enabling future Autodesk learners

AUTODESK Authorized Training Center

Autodesk **Authorized Training Centers** (ATC®) are organizations or businesses that deliver high quality learning experiences to customers, students, and educators. Empower future innovators with deeper Autodesk product knowledge, prepare students for certification exams, and enable learners to achieve their career goals in an evolving world.

AUTODESK Authorized Academic Partner

Autodesk **Authorized Academic Partners** (AAP) work with academic institutions to prepare educators to inspire and empower the next generation of innovators, and with students to prepare them for the industries in their future. Academic Partners provide educators and students with collaboration opportunities, focused conversation, and certification exam preparation.

AUTODESK Certified Instructor

Autodesk Certified Instructors (ACI) are credentialed professionals who are recognized for their product mastery, delivery, and instructional skills. ACIs are vetted by Autodesk and affiliated with Autodesk Learning Partners. Earn your customer's trust with a digital badge validating your ACI credentials.

Depending on program authorization, Learning Partners can use Autodesk software products to provide learning services to end users in the following contexts:

- ▶ Learning delivered in the classroom
- ▶ Learning delivered with a remote conferencing tool
- ▶ Learning delivered with virtualized software
- ▶ Learning delivered using an approved mobile device
- ▶ Learning delivered on campus to students and educators
- ▶ E-Learning course facilitation
- ▶ Certification exam facilitation
- ▶ Staff enablement

Made by Autodesk. Powered by Learning Partners.
