Professional Bio	<p>Amanda Lane is a board certified renal dietitian, Certified Diabetes Care and Education Specialist and Founder of Healthful Lane Nutrition LLC. While working with dialysis patients, Amanda became passionate about patients with CKD when she learned most of her dialysis patients had not met with a dietitian prior to dialysis. She serves on the Dietitian Advisory Board for the American Kidney Fund which was instrumental in the development of Kidney Kitchen® Pro, a no cost resource for RDNs working with kidney disease patients. Amanda enjoys helping patients understand the complexities of diabetes and CKD by working to remove the fear and stigma of both diseases. She values the links between food, culture and health and enjoys seeing patients thrive while enjoying their preferred foods and living a healthful lifestyle.</p>
