

Veronica Brady PhD, MSN, FNP-BC

Veronica Brady PhD, MSN, FNP-BC, is a nurse practitioner in the School of Medicine at the University of Nevada-Reno. She received her BSN at Wayne State University, her MSN at University of Detroit and her PhD at the University of Texas, Houston, TX.

Dr. Brady's research interest is in the area of steroid induced hyperglycemia in patients with cancer, particularly those patients receiving high dose steroids as a part of their cancer treatment regimen. Dr. Brady is board certified in advanced diabetes management as well as being a certified diabetes educator. Dr. Brady's past experience as a nurse practitioner managing patients with diabetes and cancer as well as the resources available to her place her in a good position to explore this area of research and respond to any issues that may arise.

She has received many honors and more recently awarded the American Association of Colleges of Nursing—Honorable mention for Excellence in Advancing Nursing Science Award for 2015-2016.
