

THE CERTIFIED ADVANTAGE:

- Explore in depth the technical design and implementation of security controls.
- Gain a better understanding of risk management, documentation, and auditing.
- Use real-world exercises to understand possible solutions, technical considerations, and configuration.
- Get hands-on experience with software applications.

WHAT YOU WILL LEARN:

- Incident Response Procedures
- System Hardening
- Mobile Device Management
- Penetration and Vulnerability Testing
- Patch Management
- Social Engineering Testing
- Perimeter, Network, and Endpoint Security
- Data Backup and Replication

TESTIMONIAL:

"The CCBTP course was eye-opening and valuable to my role in creating a secure environment at my company. The hands-on nature of the course and the ability to immediately apply what I learned is invaluable. I will definitely be looking into other courses in the future.

- Steve Larson, WI
