**MISSION
MINUTE:
GET OUT AND VOTE!**

Everyone is COUNTING on you!

- Don't get caught being a "didn't vote" statistic! More than 200 million Americans were eligible to vote in 2016 but only 59% made it to the polls.
- Let your voice be heard when others will be making decisions that affect you. Voting is the path to direct political influence and is part of your independence.
- Ask election candidates where they stand on the issues that affect all of us --- ensuring equal protections and equal opportunities among people of color and supporting women's and girls' equality, health and safety.
- Get connected. Join YWCA and other community efforts to fight voter suppression and ensure that our democracy reflects the will of all its people.
- Get registered and get others to the polls. Make exercising your vote and encouraging others to do the same your #1 priority!
- Get educated. Know (see for yourself) what each candidate will do and what he or she won't do.

Your vote counts and matters. It matters to the future of you, your family, and your community.
